

Report: Show total revenue per month

Here are the key findings from our monthly revenue analysis:

- * Our business maintained strong revenue throughout 2023, consistently bringing in over \$360,000 each month.
- * The highest-performing months in 2023 were January, April, October, and November, all exceeding \$430,000 in sales. This suggests strong periods at the beginning and end of the year.
- * Revenue dipped slightly in certain months, such as February, July, and September, but still remained robust, generally staying above \$367,000.
- * For January 2024, the recorded revenue is significantly lower. This is typical and expected, as we likely only have partial sales data available for the current month.
