

# Report: Show total revenue per month

Here's an explanation of the analysis findings:

- \* Our analysis did not generate a report showing the total revenue for each month.
- \* This means we currently don't have a clear breakdown of how much income we generated month-by-month.
- \* Because we couldn't retrieve these figures, we're unable to track our financial performance over time or identify any monthly patterns in our revenue.
- \* To get this crucial insight, we need to investigate why the revenue information didn't appear in the report. This will help us ensure future analyses can successfully display our monthly earnings.
