Report: Show total revenue per month

Here are the findings from your request:

*   **No Results Found:** My analysis completed successfully, but it didn't find any revenue figures to display for each month.
*   **Possible Data Gap:** This often happens if there isn't any sales or revenue data recorded in our system that we can use for the calculation.
*   **Data Availability:** It could also mean the revenue information isn't currently stored in a format that allows us to easily group it by month.
*   **Next Steps:** To get you the total revenue per month, I'll need to investigate if we have this specific data available and how it's currently organized.
